

US Criminal Search Sources

At MyBackgroundCheck.com, compiling a background report is a complex process—results are actually obtained through a combination of multiple searches. Each search is tailored with specific criteria in mind, enabling us to provide you with the most comprehensive results possible.

Our most popular background check is called a US Criminal Search. With this search, we have access to more than 300 million criminal records nationwide. Personal records are maintained by numerous county, state and federal agencies, and the US Criminal Search allows us to retrieve and report those records.

Since we investigate a variety of sources when conducting a US Criminal Search, we know that our reporting is as thorough as possible. The following is a list of sources (not all inclusive, subject to change) that MyBackgroundCheck.com searches when compiling the US Criminal Search background check.
